

Vertical Wall Issues and Solutions

Tuesday December 1, 2020

2:00-4:30 PM

Zoom Meetings

\$37.00 per person (Earn 2.5 CEH's)

Today, there is an enormous stockpile of existing, outdated and energy inefficient buildings. This program will examine and define the two (2) primary options associated with Building envelope renewal – RESTORATION vs. RENOVATION. Learn the impact that proper building envelope design has on occupant health and comfort, energy savings and building longevity. Identify and select performance-based products for foundations, walls and roofing systems.

Program Content

Building Envelope Solution – CCM121

1. Recognize the importance of the building envelope concept.
2. Identify and select performance-based products for foundations, walls and roofing systems
3. Design, best-practices and installation of the building envelope system
4. Proper tie-in detailing between foundation and wall, wall and roof, and roof and window

Presented by: Danielle Hancock - Architectural Sales Rep, Rocky Mountain Reps

Achieving a Comprehensive Building Envelope Wall Renewal Program

5. Outline reasons to pursue a building envelope renewal program.
6. Define an overall process and approach toward building envelope inspection, assessment, reporting and scope of work determination.
7. Review the supporting benefits of a building renewal program
8. Explore the differences between restoration and renovation approaches and discover continuous insulation.

Presented by: Chuck Bundrick - CSI, LEED GA, DRYVIT SYSTEMS, INC.
